

AUTOMATION MADE EASIER

Ready to streamline your automation? Movu robotic systems are endlessly scalable, highly adaptable, and require minimal infrastructure changes. When paired with Hy-Tek's IntraOne™ software platform, they seamlessly integrate with your existing technology—making warehouse automation easier than ever.

READY FOR EASIER AUTOMATION?

**Tour our Innovation Lab to see
Movu systems in action.**

**Installation
Made Easier**

READY TO GO

With a plug-and-play design, Movu automation solutions don't require complex warehouse redesigns or infrastructure changes.

FASTER INSTALL MEANS MORE UPTIME

Compared to other automation systems, Movu systems can be installed quickly and easily, limiting disruptions to your daily warehouse operations.

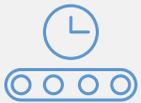

**Modularity
Made Easier**

BUILT AROUND YOU

Movu automation systems were developed with endless modularity in mind, so you can build a system that suits your unique needs and change it any time.

ADD, DON'T OVERHAUL

Movu makes it easy to add storage space without making any structural changes, giving you more space when you need it and more flexibility to grow.

**Efficiency
Made Easier**

LESS ENERGY MEANS MORE POSSIBILITIES

Movu systems don't require typical storage and retrieval machines, reducing energy consumption and improving warehouse efficiency.

KEEP IT COLD

Movu systems are uniquely suited for cold storage and cold-chain logistics, making them a smart way to save space, save energy and keep employees out of harsh temperatures.

**Space-Saving
Made Easier**

OPTIMIZE EVERY SQUARE FOOT

By letting you eliminate aisles between racks or heavy stacker cranes, Movu systems let you use space that would otherwise remain unused, for up to 50 percent more storage space.

STREAMLINE YOUR STAGING

Automating your staging areas with Movu robotics gives you greater flexibility and productivity, from the moment you receive goods to the time you load them for shipping.

**Collaboration
Made Easier**

PERFECT THE PICKING PROCESS

By allowing safe, efficient human-machine interaction during order picking, Movu systems let you harness the joint strength of humans and robotics, working together in harmony.

MEET YOUR NEW ASSISTANTS

Fast, accurate and scalable picking is essential for an optimized warehouse. Movu solutions give you the perfect blend of precision and productivity, without the need to hire more people.

**Integration
Made Easier**

HY-TEK ORCHESTRATION

Hy-Tek's integration expertise and Movu's Warehouse Execution Software (WES) let you integrate Movu solutions seamlessly into your operation, for fast implementation with minimal worker training.

STRATEGY AND SUPPORT

Movu innovation powered by Hy-Tek's aftermarket support and strategic services makes it easy to optimize your operation today, tomorrow and for years to come.
